Why did you feel the need to renovate your practice

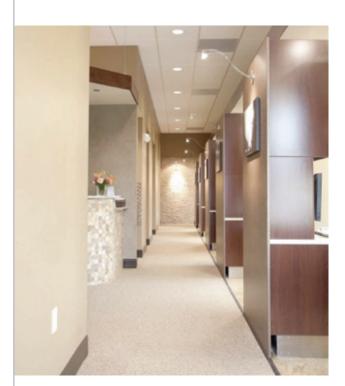

After 21 years in an existing space, the relocation decision was made to move to a new building providing us with a clean, empty shell.

What factors weighed into your decision of using Symmetry Dental Direct for your restoration process

Price was important, however, it wasn't the most important factor in our decision process. The flexibility that the Symmetry cabinetry designs offered were right in check with what our practice was looking for. The Symmetry team was also outside the standard in this industry so along with the cost, flexibility and customization in the cabinetry / design process – it made our decision.

Dental 133, Dr. Lori Engelmann

Why did you choose Symmetry Dental Direct to be your design partner

Symmetry Dental Direct had the offerings for the interior cabinetry and it all integrated. Plus, Symmetry worked really well with our designer, architect and contractor.

How did the Symmetry ID system simplify your project

The Symmetry design and style was the right look – everything integrated very well with the overall design scheme. Basically, the Symmetry solutions we able to fit the design and spacial needs.

What was your experience with Symmetry's 360 Project Management

Symmetry's, Brett Wandfluh's role for us, as a client, was cabinet design and integration with regards to our new building space. Brett was on top of everything – all the time!

What do you like about the finished project

The Symmetry cabinets. They just reflect the style we were after. The design was there and the quality was very good – it just fit the space. I have to say, we have had no issues with the cabinetry, since the installation.

Would you recommend Symmetry Dental Direct

Absolutely, and have several times!

Dr. Lori Engelmann, Leawood, KS

- Symmetry Cabinetry is well-designed and built. The cost is about 30% less than ADEC for a better looking cabinet. "
- "It was fantastic to deal with just one company for all of our cabinet needs."
- Our primary motivation was we wanted to achieve a higher level of design than could be accomplished by our dealer. "
